

Brainstorming & Idea Prioritization Template

Feature Exploration & Feasibility Assessment

Organization: SmartBridge / Skill Wallet	Date: 30-09-2026
Team ID: SWTID-2026-5650	Track: AI/ML & GenAI
Project Name: ComicCraft - AI Comic Story Creator using Gemini Models	Phase: 1. Brainstorming & Ideation

Step 1: Feature Idea Generation & Grouping

1. Script Parsing & Pacing Automated Gemini script parser to convert text into structured panel descriptions.	2. Character Consistency Engine Multimodal style-locking using reference image anchors to maintain identity.
3. Panel Layout Compiler Grid-based comic template compiler supporting standard superhero, manga, & webtoon formats.	4. Speech Bubble & SFX Overlay Automatic positioning of dialogue balloons, caption boxes, and comic action text (POW!).
5. Art Style Preset Selector One-click aesthetic filters (e.g., Noir, Anime, Western Comic, Watercolor).	6. Multi-Format Exporter Export finished stories as high-res PDF or CBZ (Comic Book Zip) files.

Step 2: Prioritization Evaluation Matrix

Feature Idea	Impact	Feasibility	Priority Level	Status
Gemini Script Parser & Panel Splitter	High	High	P1 (Must Have)	Selected
Text-to-Panel Generation (Basic Style Lock)	High	High	P1 (Must Have)	Selected
Panel Layout Grid Compiler	High	High	P1 (Must Have)	Selected
Speech Bubble & SFX Overlay Generator	Medium	High	P2 (Next Phase)	Selected
Multi-Character Pose & Costume Lock	High	Low	P2 (Next Phase)	Selected
Art Style Presets Selector	Medium	High	P3 (Nice to Have)	Deferred
PDF & CBZ File Export Options	Low	High	P3 (Nice to Have)	Selected
Interactive Drag-and-Drop Canvas Editor	Low	Low	P4 (Out of Scope)	Dropped
